

VOO Ward Admin Dashboard – Project Proposal

Executive Summary

This proposal presents a web-based dashboard for Kyamatu Ward to manage issues, bursaries, communication, and data analytics efficiently.

Key Features

- Issue tracking and resolution
- Bursary processing
- Citizen registration
- Announcements via web and USSD
- Real-time analytics
- Audit trail for accountability

Objectives

- Centralize issue management
- Digitize bursary processing
- Improve communication
- Enable data-driven decisions
- Ensure security and accountability

Core Modules

- Issue Management
- Bursary Processing
- Announcements
- Constituent Registry
- Analytics & Reporting
- User Management

System Overview

- Web dashboard, mobile app, and USSD integration
- Backend: Node.js + Express
- Databases: PostgreSQL, MongoDB
- Security: Authentication, access control, audit logs

Implementation Phases

1. Foundation
2. Core Modules

3. Analytics & Integration

4. Deployment

Expected Benefits

- Faster response to issues
- Transparent bursary allocation
- Increased citizen engagement
- Better decision-making
- Improved efficiency

Conclusion

The system will modernize ward administration through a secure and scalable digital platform.
